VERSIONS WITH MARKINGS TO SHOW CHANGES MADE

3.(Amended) A method of synchronizing databases of a plurality of monitoring devices according to Claim 1 or 2, further comprising:

a sixth step of receiving, by the first monitoring device, a control request for controlling the communications device from an operator; wherein the first step, when the first monitoring device receives the control request from the operator, the first monitoring device transmits the control command with a network address of the first monitoring device to the communications device.

4. (Amended) A method of synchronizing databases of a plurality of monitoring devices according to any of Claims 1 through 3, wherein the registered data is physical data.

13. (Amended) A system of synchronizing databases of a plurality of monitoring devices according to Claim 11 or 12, further comprising:

a control request receiving unit receiving a request for controlling the communications device from an operator; and

wherein the control command transmitting unit transmits the control command with a network address of the first monitoring device from the first monitoring device to the communications device, when the first monitoring device receives the control request from the operator.
